

Light, lined outdoor softshell-jacket for extreme weather conditions

Functional material made of recycled polyester with TPU-membrane
 Wind- and waterproof (10,000 mm water column)
 Breathable and permeable to water vapour (5,000 g/m²/24h)
 Taped seams, waterproof zips
 Light mesh
 Full-length concealed 2-way zip with chin protection
 2 side pockets, 1 inner pocket
 Fully adjustable hood
 Hook and loop fastener for width adjustment on sleeves
 Ergonomic fit, extended back section
 Fashionable reflective details on the sleeves and at the back
 Zip for decoration at the back
 JN1179: Lightly waisted
 Zips: YKK

Fabric: Outer fabric (140 g/m²): 100% polyester (recycled)
 Lining: 100% polyester (recycled)

Country of origin: Volksrepublik China

Softshell

Softshell with TPU membrane consists of three layers. Due to the microporous TPU membrane as middle layer the material is water-proof, wind-proof and breathable at the same time.

Recycled Polyester

PET bottles are recycled to create a new fashion. Plastic bottles are crushed, melted down and spun to yarn again, which is sometimes completely integrated into the production.

Breathable-Permeable to water vapour

Functional textiles must have the ability to transport moisture from the skin to the fabric surface as fast as possible. Permeability shows how much steam in grams can evaporate on a surface of 1 m² within 24 hours. The higher this figure, the more breathable the textile is.

Water column from 1.500 mm

The ability to withstand water pressure without moisture penetrating into the material is given by the water column (mm). The minimum standard is a water column of 1,500 mm.

Taped seams

To avoid moisture penetrating into the fabric, seams and stitches can get taped. Taped seams are 100 % water-proof.
