 lime-green (360C)
 red (200C)

black (blackC)
 navy (296C)

dark-grey (7538C)
 off-white (off-white)

Features

Thinsulate

Air molecules cling to the body. The more air a material stores in a certain space, the higher the insulation level will be. Microfibres are much finer than other fibres. Therefore, they enclose more air within a smaller space thus offering a better insulation. The advantage: breathable, moisture-repellent and suited both for washing in the washing machine and for dry cleaning.
