Short Description

Falcone personal parasol met ventilator

Description

Enjoy the sun and have fun with your new Falcone® Personal Parasol. A cooling umbrella with an integrated fan! • It is a beautiful sunshade, cooling you down as your private shadow-maker • An integrated fan that you operate with a push of a button • It has a unique UPF50+ coating that provides protection against harmful UV radiation • The cover is fully windproof, so it can be used during windy or rainy days as well • Its creative inside summer design will always cheer you up! The extent to which a sunshade protects from UV radiation is expressed in UPF: Ultraviolet Protection Factor. A UV spectrometer measures how much UVB and UVA radiation permeates a fabric. UPF 50+ means a maximum of 2% of the harmful UV radiation passes that material. In other words, your Falcone® personal parasol blocks at least 98% of this radiation! Keep in mind that no parasol can fully protect you from UV radiation. That's because sunshine is reflected by air particles, causing UV radiation to reach your skin even when using a parasol.

Additional Information

EAN code	8713414818988
Color	Black
In Backorder	0
