

Fashionable winter softshell jacket

3-layer functional fabric with TPU membrane
 Wind- and water-proof (5,000 mm water column), breathable and permeable to vapour
 Non-taped seams
 Detachable, padded and lined hood, warming fleece collar
 Zip under the sleeves for additional ventilation, full-length storm flap
 Fashionable reflective piping on shoulders and front pockets
 2 front pockets, 1 breast pocket, inside breast and mobile phone pocket
 2-way zip
 Elastic cord with stoppers on waistband and hood
 JN1001: Slightly waisted
 Zip for decoration at the back

Fabric: Outer fabric (330 g/m²): 95% polyester, 5% elastane
 Lining: 100% polyester
 Padding: 100% polyester

Country of origin: China

Customs tariff number 62029300

Softshell

Softshell with TPU membrane consists of three layers. Due to the microporous TPU membrane as middle layer the material is water-proof, wind-proof and breathable at the same time.

Breathable-Permeable to water vapour

Functional textiles must have the ability to transport moisture from the skin to the fabric surface as fast as possible. Permeability shows how much steam in grams can evaporate on a surface of 1 m² within 24 hours. The higher this figure, the more breathable the textile is.

Water column from 1.500 mm

The ability to withstand water pressure without moisture penetrating into the material is given by the water column (mm). The minimum standard is a water column of 1,500 mm.

Reflex

IQseen is the brand for high reflective materials. With an even distribution around the body this material will make the wearer visible of a distance up to 160 meters. IQseen silver reflective materials fulfill the requirements of the EN 471. Millions of glass beads reflect the light back to its source. The wearer of the product becomes more visible and the motorist has more time to react. This makes the difference! Clearly visible!
