

**2 in 1-jacket with detachable sleeves**

Wind-and waterproof 3-layer functional fabric with TPU-membrane (5,000 mm water column)
 Breathable and permeable to water vapour
 Seams not taped
 Stand-up collar
 Inside in contrasting colour, contrasting piping at the front, at the back and on the sleeves
 Fashionable reflective, concealed front zip
 Fashionable reflective details on shoulders, at the back and on the sleeves
 2 side pockets, 1 zipped inner pocket
 Pocket on sleeve with reflective zip
 JN1121: waisted

Fabric: Outer fabric (230 g/m²): 100% polyester

Country of origin: Myanmar (Burma)

Customs tariff number 62019300

Softshell

Softshell with TPU membrane consists of three layers. Due to the microporous TPU membrane as middle layer the material is water-proof, wind-proof and breathable at the same time.

Breathable-Permeable to water vapour

Functional textiles must have the ability to transport moisture from the skin to the fabric surface as fast as possible. Permeability shows how much steam in grams can evaporate on a surface of 1 m² within 24 hours. The higher this figure, the more breathable the textile is.

Water column from 1.500 mm

The ability to withstand water pressure without moisture penetrating into the material is given by the water column (mm). The minimum standard is a water column of 1,500 mm.

Reflex

IQseen is the brand for high reflective materials. With an even distribution around the body this material will make the wearer visible of a distance up to 160 meters. IQseen silver reflective materials fulfill the requirements of the EN 471. Millions of glass beads reflect the light back to its source. The wearer of the product becomes more visible and the motorist has more time to react. This makes the difference! Clearly visible!
