coldblack®

Textiles with a coldblack®-finish afford optimum protection against heating up through sun rays. They stay cooler and protect reliably against UV rays (min UPF 30). The effect of this is that the person wearing these garments does not sweat so easily, feels better and is even more efficient. coldblack® is a registered trademark of Schoeller Technologies AG, Switzerland (patent pending).

UV Protection

Textiles with the symbol UV-protection are characterized by sun protection comparable to the protection of a sun-screen. The information is given in UPF (UV-protection factor). This indication implies the factor by which the period of time spent in the sun can be extended without getting sunburnt. It is calculated in the same way as the sun protection factor of a sun-screen.
